This plant, a native of Europe, has recently been brought before the public. It usually blooms from the middle of May until Nov. It is specially adapted for decorative purposes. It will flourish anywhere from the mountains to the seashore. Its color, a bright magenta, and its fine foliage make it a very effective and showy plant for edgings and borders.			
The Essex Witch. This pink, offered in quantities, for the first time, is unsurpassed in fragrance by any hardy pink. Color, a bright dark pink. Flowers double, petals fringed, calyx firm enough to prevent bursting when in full bloom. Semi dwarf in habit, a great bloomer, foliage compact, and of peculiar shade of green. Makes an ornamental plant the entire season, grown in clumps or in borders.	.75	5.00
